

About Sharing Data...

Yearly, the Office of Career Services compiles student post-graduation information through the Senior Survey, faculty, staff, employers, and other means to build the most robust snapshot of student post-graduation success. Post-graduation success includes employment, service (volunteer, military, and religious) and further education. This information is shared with key university constituents including our faculty/schools.

Any information you have would be greatly appreciated in helping us provide the best information to all. This will help the university community discover the value of a Catholic U education as well as let others know of student success.

Please submit any student information using the data collection form under '*Submit Student Post-graduation Information*'. Questions? Please contact the Office of Career Services at careers@cua.edu or 202.319.5623.
